

First Slide:

Mustafa: Good evening, everyone! Have you ever struggled with creating PowerPoint presentations that are visually appealing and engaging? Well, today, myself Mustafa and Laiba are here to show you how you can create stunning presentations using the power of AI.

Second Slide:

Did you know that PowerPoint has built-in AI-powered features that can make your presentations more efficient and effective? that is Designer and Presenter Coach.

Third Slide:

Presenter Coach provides feedback on your presentation style, including your delivery, pronunciation, and pacing. This feedback can help you improve your presentation skills and make your delivery more engaging and effective.

And Designer can automatically create slides with professional designs by suggesting layouts and images that complement your content. This can save you time and effort in creating visually appealing slides that capture your audience's attention.

Fourth Slide:

Now let's see how you can create professional looking slides using Designer

Designer improves slides by automatically generating design ideas to choose from. While you're putting content on a slide, Designer works in the background to match that content to professionally designed layouts.

Ask for design ideas by clicking the Design button on the ribbon. Then scroll through the suggestions in the Designer pane on the right side of the window. Finally select the design of your choice.

Fifth Slide:

Designer offers you professional layouts and gives you several suggestions for arranging your content in a cohesive, attractive layout.

If there is too much text on your slide, Designer can turn it into lists or any easily readable graphic

Designer also suggests icons for your bulleted items.

Sixth Slide:

Laiba: In addition to designer, Presenter Coach helps you prepare to give more effective presentations.

Engaging your audience is crucial for a successful presentation.

Presenter Coach can analyze audience sentiment and engagement levels during a presentation. By understanding how your audience is reacting, you can make adjustments in real-time to keep them engaged.

Presenter Coach evaluates your pacing, pitch, your use of filler words, informal speech and detect when you're being overly wordy so you never lose your audience's attention.

Let's see how to use Presenter Coach:

On the Slide Show tab, select Rehearse with Coach. Select Start Rehearsing when you are ready to begin rehearsing.

Seventh Slide:

Begin Speaking, when you see the "Listening" appear in the little dialog box.

As you speak, Presenter Coach gives on-screen guidance about pacing, inclusive language, use of profanity, filler words, and whether you're reading the slide text.

Eighth slide:

When you're done with your speech, exit the full-screen view. Presenter Coach opens a Rehearsal Report window that includes statistics of your pace, vocabulary, engagement levels and summarizes what it observed and offers recommendations to make your presentation more effective and engaging

Ninth slide:

In conclusion, by leveraging the power of AI, you can create visually stunning and engaging PowerPoint presentations that captivate your audience. The benefits of using AI tools for PowerPoint presentations include time savings, enhanced visuals, and improved audience engagement.

So, with the power of AI at your fingertips, you can create visually stunning and engaging PowerPoint presentations that captivate your audience. Give it a try and take your presentations to the next level!

Thank you for your attention!
