Question Q2 Weightage: 5 ; Marks: 5

An e-commerce website is running a special discount offer on the final amount of purchased items. You have to determine the amount after applying for a discount . Ask the user to enter their total purchase amount.

Apply the following discount rules:

- If the total is **less than \$50**, no discount is applied.
- If the total is **between \$50 and \$100**, give a **5% discount**.
- If the total is **more than \$100**, give a **10% discount**.

Display the **final payable amount after discount**

Question Q3 Weightage: 10 ; Marks: 10

React.js : The website must be interactive - UI holds marks

Design and develop a React.js-based interactive Tourism Website. The website should contain multiple pages, including:

- About Page
- Contact Page with a contact form
- Booking Page (with a booking form)

Booking Form Fields:

The Booking Page will feature a form with the following fields:

- First Name
- Last Name
- From and To Destinations
- Age dropdown selection

Implement Form Validation:

First Name: Cannot be empty. Display an error message: "First name is required."

Last Name: Cannot be empty. Display an error message: "Last name is required."

Departure and Arrival locations must not be empty

2. Handle Form Submission:

Make the handleSubmit function to only submit the form if all validations pass.

If any validation fails, do not submit the form and display the relevant error message(s) next to the respective input fields.

The Site must be interactive with proper styling includes marks

Instructions:

- All the components must be in a separate component files in the folder component like
Navbar.js: Contains the navigation menu for the website.
BookingForm.js: The form component with validation.
AboutPage.js: The About page component.
ContactPage.js: The Contact page component.

-----Best of Luck-----
