Lab Mid Exam

Total Time: 1.5 Hours
Total Marks: 25
Total Questions: 03

Semester: SP-2025
Campus: Karachi
Dept: SE

Student Name Roll No Section Student Signature

General Instructions:

- Carefully read the following instructions before attempting the paper.
- Except your Roll No and Section, DO NOT WRITE anything on this paper.
- The Exam consists of 3 questions on 3 printed sides of 2 page.
- In case of any ambiguity, you may make assumptions, but your assumption must not contradict any question.
- **Submission Instructions:**
 - You must comment your student ID on top of each file.
 - Name the .cpp file for each question according to Roll_No e.g. k22xxxxQ1.c, k23xxxxQ2.c etc.
 - Create a folder with the name K23XXXX according to your student id.
 - Put all your files (1 for each question) in the above folder. Then paste this folder on the local share.

Write a program that:

1. Stores the correct password in a JavaScript variable.
2. Ask the user to insert a user name
3. Asks the user to enter his/her password.
4. Validates the two passwords:
 - Check if the user has entered a password. If not, display the message: "Please enter your password".
 - Check if both passwords are the same. If they match, display the message: "Correct! The password you entered matches the original password and also display a welcome note with the name of a user" Otherwise, display: **"Incorrect password"**.

Question Q3 Weightage: 10 ; Marks: 10

React.js Form Validation Challenge

Design and develop a React.js-based interactive Job Application Website. The website should have multiple pages, including:

- Home Page
- Job Listings Page (Displays a list of job positions)
- Application Page (with a job application form)
- Application Form Fields:

The Application Page will feature a form with the following fields:

- Full Name
- Email Address
- Phone Number
- Position Applied For (Dropdown list of available positions)
- Cover Letter Field

Requirements:

1. Form Validation:

Implement form validation to ensure the following:

Full Name: Cannot be empty. Display an error message: "Full name is required."

Email Address: Must be a valid email format (e.g., user@example.com). Display an error message: "Please enter a valid email address."

Position Applied For: Cannot be empty (ensure a valid selection from the dropdown). Display an error message: "Please select a position."

Cover Letter: Cannot be empty. Display an error message: "Cover letter is required."

2. Handle Form Submission:

Make the handleSubmit function to only submit the form if all validations pass.

If any validation fails, do not submit the form and display the relevant error message(s) next to the respective input fields.

The Site must be interactive with proper styling includes marks

Instructions:

- All the components must be in a separate component files in the folder component like

Navbar.js: Contains the navigation menu for the website.

HomePage.js: contains a simple interactive webpage

JobsPage.js: The page with job listing.

ApplicationForm.js: The page contains an application form with submit button.
