ASSIGNMENT # 01

Question # 01

As part of assignment # 1, students are required to apply their knowledge of preparing test cases by analyzing and reviewing the user or system requirements.

The sample mobile app will be provided to the students to test against the following given requirements as assignment # 2.

Please go through all the requirements/user stories below and prepare the positive and negative test cases.

Requirement # 1

This is where the user should land when open our app on any mobile device.

Requirement # 2

New user can sign up the application. Following screen should be displayed when user clicks on Sign up option.

The screenshot shows the 'Sign Up' screen of the 'Fuel Tracker' app. At the top, the status bar displays the time 3:47 and various icons. The app title 'Fuel Tracker' and a fuel pump icon are at the top. Below the title is the 'Sign Up' heading. The form consists of four input fields: 'Full Name', 'Email', 'Password', and 'Confirm Password'. Each field has a placeholder text. The 'Password' and 'Confirm Password' fields have an eye icon to toggle visibility. Below the form is a black 'SIGN UP' button. At the bottom, there is a link: 'Already have an Account ? Sign In'.

A success message should be displayed when user registers successfully on the app.

The screenshot shows the 'Login' screen of the 'Fuel Tracker' app. At the top, the status bar displays the time 3:51 and various icons. The app title 'Fuel Tracker' and a fuel pump icon are at the top. Below the title is the 'Login' heading. The form consists of two input fields: 'Email' and 'Password'. Each field has a placeholder text. The 'Password' field has an eye icon to toggle visibility. Below the form is a black 'SIGN IN' button. At the bottom, there is a link: 'Don't Have an Account ? Sign Up'.

Below the login screen, a success message is displayed in a white box with a green checkmark icon: 'User Registered Successfully.'

An error message should be prompted if user attempts to sign up the app without providing the required data. All the necessary validations should be performed like email format, password and confirm password etc.
