7:16 PM

Can you help me, my laptop is encountering a blue screen

Contoso Tech Support Pro / AI generated 7:17 PM

I can definitely help with that. A **blue screen (BSOD)** usually means Windows hit a critical error, but many cases can be fixed with a few guided steps. Let's start **right now** with safe, practical troubleshooting you can do immediately.

Step 1: Capture the Error Details (Very Important)

When the blue screen appears, look for:

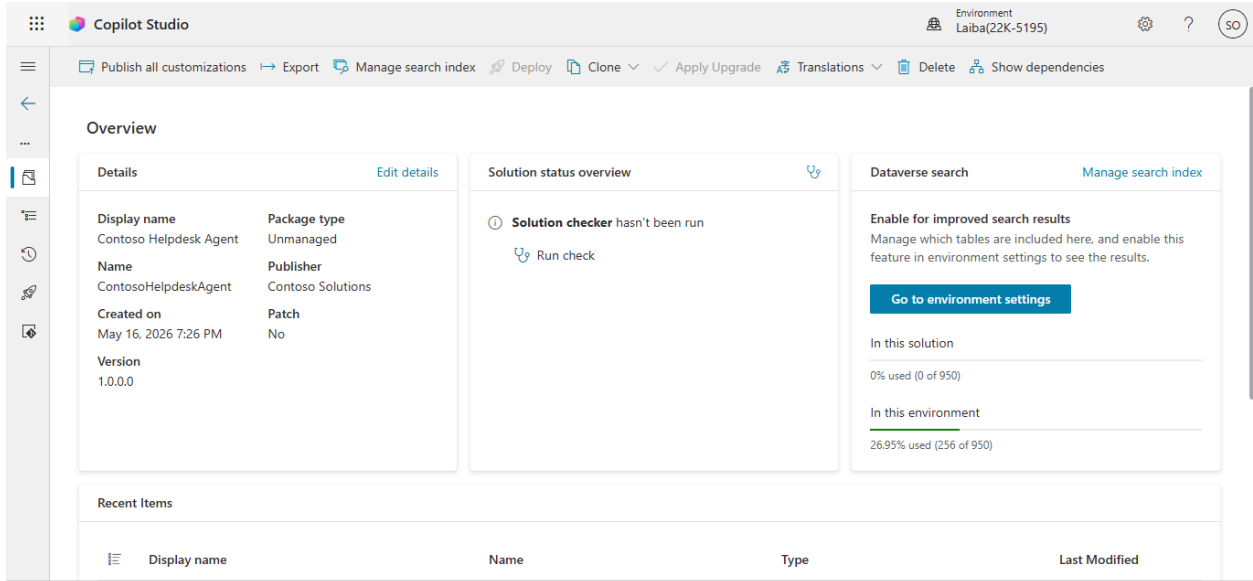

- A **STOP CODE** (for example: `CRITICAL_PROCESS_DIED`, `MEMORY_MANAGEMENT`, `IRQL_NOT_LESS_OR_EQUAL`)
- Or a **file name** (like `ntoskrnl.exe`, `win32k.sys`)

If the screen restarts too fast:

Lab 7

The screenshot shows the Copilot Studio interface for 'Contoso Helpdesk Agent'. The left sidebar has 'Agents' selected. The main area is titled 'Test your agent' and shows a list of topics on the left: 'Search sources' (Knowledge, 3), 'Search sources' (Knowledge, 1), 'Search sources' (Knowledge, 1), and 'Available devices' (Topic, 7). The 'Available devices' topic is selected, and its details are shown in the center. The details include a description, inputs, and outputs.

Available devices
Topic

Description
This topic helps users find devices that are available from our SharePoint Devices list. User can ask to see available devices and it will return a list of devices that are available which can include laptops, smartphones, accessories and more.

Inputs
VarDeviceType (String)
Laptop

Outputs
Edit topic

On the right, there is a chat window titled 'New test session'. It shows a message from the agent: 'Would you like to **request this laptop?** If so, I can proceed with the request for you! 🤖'. Below the message is a text input field with the placeholder 'Ask a question or describe what you need' and a 'Send' button.

Lab 8

The screenshot shows the Copilot Studio interface for 'Contoso Helpdesk Agent'. The left sidebar has 'Agents' selected. The main area is titled 'Test your agent' and shows a list of topics on the left: 'Available devices' (Topic, 0) and 'Request device' (Topic, 0). The 'Request device' topic is selected, and its details are shown in the center. The details include a description, rationale, and a 'Show rationale' link.

Request device
Topic

Description
This topic helps users request a device when they answer yes to the question that asks the user if they would like to request one of these devices.

Rationale
Show rationale

On the right, there is a chat window titled 'Device selection'. It shows a message from the agent: 'Please select which device you would like to request:'. Below the message is a text input field with the placeholder 'Ask a question or describe what you need' and a 'Send' button.

Lab 9

The image shows the Copilot Studio Designer interface for an agent flow named "Send device request email". The flow is composed of three sequential actions: "Get Device", "Send an email to manager", and "Respond to the agent". A green notification banner at the top states: "Your agent flow was published. Flow runs consume capacity based on the number of actions used, but test runs won't consume any." The interface includes a left sidebar with navigation options (Home, Agents, Flows, Tools) and a top bar with tabs (Overview, Designer, Activity, Analytics) and buttons (Save draft, Publish).

The image shows the Copilot Studio Topics view for the "Contoso Helpdesk Agent". A table lists custom topics, and a "Test your agent" panel on the right shows a chat interaction.
