

Digital Transformation Tools and Techniques.

Date _____

Technical:- MV-500, 700.

Solution Architect:- MV-300. = Functional consultant.

Paper:- case studies

Enterprise Resource Planning:-

A brand (Khaadi, J.) → have very many branches.

As an investor, I'd care about internal workings only profit.

→ one spw for Employee Mgmts, Inventory Mgmt, Excel sheets for top hierarchy.

→ whatever enterprise, resource (money earned or paid) → everything is traceable

→ Good ERP → keep all states transparent.

→ Processes became streamlined like supply chain (product to customer tk pucha diya)

Machine ke parts
↑
change krna new krna

Inventory, Employee, Supply chain, Asset, General ledger.
MS 365 → cloud

First ERP of Ms:- 3.0 Version. → on-premise system

4.0

2009

2012

365

} we will discuss difference.

Important line

Date: _____

Box banaya aur sai chhain usme adaldin → use to kr diya
Phir bad mei alag alag.

- some users may not want specific management systems so they can opt for customised modules.
- MS work on licenses.

① Procure to Pay:- whenever im running a business, i buy from someone or create myself.

When I buy something from vendor → he will send quotation

↳ Select best Quotation

↳ Then Pay :

② Code to cash → Now I have to sell.

For a Customer, we running a business a vendor.

③ Plan to Produce → I produce myself for low cost

To create a phone → I need internal items

Bill of Materials

↳ which I am ordering from somewhere else

↳ BOM → ek item ko banane ke liye aur items chahiye

General ledger:- 1 shirt, 2 pants → I note down in register

↳ receipt, cost, profit, which day we bought

Petty cash doesnot lie in the HR syst but the Bank and Cash Module.

Hot Module:- Amount Payable → Vendors. (Darzi) → PO Purchase order

Amount Receivable → Customers. → SO. Sales order.

Credit and collection → kitna paisa bach rha hai.

Tax collection → Tax esall

terminology

Date _____

Budgets:- Plan out expenses.

↳ how much on production, employees, investments.

↳ 4 stores band kr diya, 2 employees hire kr diya.

Fix Assets:- Cost bar bar na lagana. / 1 year se zyada.

↳ machines

Stylo:- 7 scenario.

General ledger, Budget, Inventory, Asset Payable & Receivable.

→ vendor, customer.

Supply Chain:- Mnp slow se migrate krna chahiye hain to dynamics.

↳ Difficulties can be coming in migration.

↳ Is your ERP capable enough to handle steps smoothly?

↳ when they cannot stop business.

→ We need experts for this decision. You need to tell them all scenarios functional & technical.

→ When func approves a certain requirement, then technical consultant see if its implementable.

→ Vanilla Implementation → out of box implementation

cost control → paisa bachao. ↓ up

→ ERP. packet mai aayi ussey use krna mushk hogya.

→ we don't need customisation

customer se relation sahi rakhna

making sure customer ko delivery mil jaye → supply chain mgmt.

~~cost control~~

updates on every step of order.

↳ write a scenario in detail

Finance → cost kitni ayi, saman kitna laga, budget tk kitna aya profit loss margin.

365 Commerce:- On brand lines (Khaadi, Stylo)

- POS system → for retail servers.
- ↳ Finance and Ops. → HQ or Back Office.
- ↳ Inventory se saman kam hua

Dynamics is so scalable that you can integrate it with any third party. Like Daraz (Frontend website) (Backend ERP).

If you don't have a frontend you can add a website then commerce with commerce.

Dynamics cloud:- Azure ~~DevOps~~.

DevOps Engineer:- Costing for servers, VMs.

ERP → If human error occurs, MS handles your servers (keeps it up 24/7)

On Premise

2012- ERP → Problem → why came on cloud with Dynamics.

↳ To implement, apna server hum maintain krna pta hai

↳ I have to bear server costing

↳ All problems related to it we have to handle.

Dynamics

Cloud → scalable, availability, cost was higher
reliability, security, flexible.

→ jitne pain zyada utni tez machine.

Data Per Type → DevOps Engg. (Machine config)

→ Inventory ki movement bhi Track krti hai.

- Carshowroom and I am using an ERP
- But I wanna upgrade.
- I chose MS ERP.
- Old data is available in old ERP.
- Will I lose my data? → No, because ERP is scalable and can be integrated with your current system.
- Saree word ERP pe hoga from your old system.
- ERP itself is capable enough to have legacy data.
- Agar koi company khti hai ke PO purane sys pe chahiye, to ye bhi hoskta hai ke ap saray legacy ops apne own sys pe kro and then ERP uski budgeting, auditing milayegi aur legacy wala data bhi milayga.
- Consultants dekhte hain changes ke bad system pe kya reflection hogi.
- work spaces:- meny 5-6 forms hain jinpe mujhe roz kam karna hai.
- Personalisation dusre users ko nazar nhi ayega → RBAC.
- Region, country, city, location like companies hoskti hain.
- left pe modules ka tab → only those which I have licensed.

Date _____

→ Number Sequence:- 801 - Islamabad

802 - Karachi.

↳ ya to issey automate krdey. → conflict nahi ayega.

↳ manual entry mai yad nhi rheyga last order no.

you can control no. sequencing → JGL01 → J. Gulshanluchyo

Jaheer no. sequencing change.

ISL0001 → Islamabad.

↳ go to org administration

↳ company se related koi bhi kaam.

↳ e.g. currency change krni ho.

↳ generic or global change.

Configuration

→ Customer group : cash, cheque, online → Vendor Group

↳ customer : which one.

↳ vendor

↳ Sales Order

↳ Purchase Order

After ERP implementation, configuration sabse pehly hoti hai.

→ ham import krengy customers if unilever brings code.

→ Data Migration ⇒ .csv import or excel import.

→ Customer ki locations bhi set hoti hain, multiple addresses.

↳ billing, business addresses.

→ Sales Order mai currency customer ki ho skti hai.

→ Dubai wala banda dollar lekr betha hai.

2 currencies → customer, organization.

Agar mai EURO mai derhi hun, meri company USD mai hai.

To wo automatically invert hojaye gi, phir wo ledger pe jaye ga.

Date _____

- Customer Account and Invoice amount can be different.
- customer name, ~~header~~ currency, delivery date, address.
- Header → sales order ~~ban~~ banahi hun aur mai customer hun, solid info
- line → detailed info → item names.

- Agar merey par 300 computer hain wo 10 Jan ko jaye } single
" " " " " 15 Jan " } sales order
ERP khud split kreyga.

- Item bhi setup hoty hain → Import.
- 2 types {
 - ↳ item
 - ↳ service.
- AC + Installation → Installation ki invoice nhi hogi
- customers Inventory Mgr. Suzuki ki paisa bhi add hui
- Shan Masala Biryani → Alias code hoty hnge. lekin truck charges nahi

- movement general → From store to store.
- har item ke against margin rkh sktte ho → kitne ka liye aur kitne becha.
- Har customer ka ap-level of fakeer par nhi yad rkh sktte.

Print Management → ERP managers ki aasani.

→ Data hai → 3 lac sales order

↳ would I scroll all them to check for a certain date?

↳ aj sales order kitne hain?

↳ kitna saman bik gya?

→ To get rid of this problem → we have report

Vanilla → no customisation implementation.

Date _____

3 Types of Report:-

- ① SSRS Report
- ② Power BI → hot trend, dashboards.
- ③ Financial Report.

→ Report useful for data visualisation, combination of dataset
↳ if not, Forms multiple pe jake calculate karna pata hai.

→ Inquiry and Report → reports hongi.

→ Periodic Task → har mahina ki invoice. → ye wali report @ module mai hogi

→ Setup Forms →

Kernel level pe choty choty ops implemented hain

Contoso Data → Dummy Data.

Customer Report → templates set, data set, parameters set

Print Management → how are you managing printers.
run in background, destination.

~~Batch Job~~ → run in background → screen select nhi hoskti.

↳ download, email karna hai

→ Personalisation → using mouse or keyboard → for self → depends on role.

Customisation → development → globally.

Developer access → 5 column arey hain query se to no personalisation
unhi agar * ki query to saving column view krskti.

- column freeze.

- Filter criteria

- column grid.

Date _____

Quick Filter :- Out of the box 11 standard.

Directly bhi laga skte, warna a link kr bhi hsktte.
hard filter, sort filter, hide column, add column.

→ segregation bhi khud se chalti hai

like Sales Order ka page hai jo jb company 1 selected hogi to uske reur
jb company 2 select hogi to usk

Lecture: 04

AX-2012 → OnPremise

D365 → cloud and Azure.

DTU → how many machines are you going to allot a server.

Dev Machine

UAT

Production

code deployment
hierarchy.

I cannot directly push on production.

upload → Microsoft
is controlling

→ a repo that can be connected.

TFs for checkin checkout.

get latest → pull.

checkin → apna latest code push kr diya.

They push hota hai us
car Report nikalta hai

they analyze coding.

Tab o hogi jbhi prod pe
jaye ga.

LCS → life cycle service → MS ka portal for VM Management.

↳ Dev ke life 8 ghantay ka time

↳ Takay cost cutting ho sakay.

LCS portal 24/7 chalta hai, usme ander different
VMs hain.

Date _____

- On which Time do you wanna upload package.
- Ms ka message ayege ke prod 1-2 ghante down rahege.

AX-2012 → Ms ne poora package apko dediya.
SQL, DB, Prod sab.

D365 → I cannot edit system code. code is locked.

All tables are on SQL Server. ———→ Dynamics.
connected thru AOS {VS
[client]}
↳ application object service
↳ heart of dynamics if close this
server than the connectivity ends

Module → Front End

Model → classes, forms, and table categorization

System

↳ Model → sari customisation ek jagah → deployable package.

Model are basically categories like currency.

ISV — Independent service vendors

Ms ka code rly layer. } 2012

Our code customer layer }

Synchronisation → ye new Model bana deta hai no schema se
sync kr deta hai.

Date _____

Sql server is read only for dynamics.

- due to RBAC (not proper)

- framework wle process se nhi guzrega kyun ke apne jkr manually dia to validation wgrah nhi hogi na child table mein entries hongr.

EDT → intg, string data types
extended data type

ERP ka phela role
sensability.

Sales id → string → string size (e.g 30)

300 jagah
use krhi

Sales id ki

• customer ne bola string size ko 15 krdo. EDT bnadi mtlb
hr form mein change krne ke bjaaye EDT mein 15 krdo
to sb jagah change (centralized).

• EDT jismein dropdown nhi bnake.

• Enum with dropdown hole.

Surrogate key: primary key consider krega record id ko.
↓
unique

Record id } companyname.

Data area } when any new table is created

Record version } # is

Partition → trend wise partition.

yer fields nhi dekheingi kyun ke inse hmara kaam nhi.

Date _____

Indexing:
Cluster

Paper: model kha
se create hoga.

non-cluster

Alot duplicate → no to duplicate nhi hoski field.
to whi primary index bnata hai.

Form pattern → yaad krlo for paper.

ksi bhi drak ka form
brakte ho inhe.

Simple list page: Records Insert krne hain bs.

Quick filter vs Grid filter.

ksi bhi column Sirf aik column pr
pr lga sket

Menu Item → jiske peche koi functionality ho.
→ Three types

↳ Display → forms

↳ Output → report

↳ Action → batch jobs / actionable class.

Menu item individual nhi chlega ksi module mein dlna
hoga use

like menu knpr usmein menu item dalenge.

Date _____

1 → Synchronize lrega

2 → build lrega.

X++ language.

Queries (select, update, delete).
